

If You Don't Have a Home-Based Business, You Are Paying TOO MUCH TAXES!!!

Congress has approved major tax breaks specifically for those who have a home-based business, because home-based businesses play an important role in stimulating and supporting the American economy.

The tax benefits to home-based businesses tend to change frequently, and when they do **change, they just seem to keep getting better and better.** If you *do not* have a home business you lose out on **ALL** these **HUGE** tax deductions. **PERIOD!**

You Must “Qualify” For Them, But That’s EASY!!

The IRS is very specific about the requirements for qualifying for home business deductions:

1. Work your business on a regular & Consistent Basis
2. Be trying to produce a profit
3. Keep good records

That’s pretty much it. NOTE, you do not have to make a profit before qualifying for the deductions—just be working towards making a profit.

That’s how to qualify, now what do you qualify for? Your home business tax breaks come in the form of a long list of tax deductions ranging from rent and utilities, to furniture and furnishings, to cars and trucks, to trips and entertainment, to even kids’ allowance!

Home-business tax deductions have helped many people cut their taxes by up to 30-50% or more! The amount of tax savings can be enough to ward off a bankruptcy, to avoid a foreclosure, or even pay for running your home based business.

You Get Big Tax Benefits If Your Home Is Your “Principle Place of Business.”

Having a Home Office can allow you to convert thousands of dollars worth of normally non-deductible personal expenses, into tax-deductible business expenses. They include a portion of your mortgage or rent (yes, RENT can be deductible!), heating, air conditioning, electricity, natural gas, oil, water, sewer, recycling fees, HOA Dues,

house cleaning, exterior painting, security alarms, maintenance costs, home repairs and MUCH MORE!

Qualifying is easy if your business is based in your home, and if the Home Office area used “*regularly and exclusively*” for business.

Uncle Sam will PAY YOU to Run a Home-Based Business!

What About The Actual Costs of Running Your Business?

The bottom line answer is that they're normally 100% tax deductible! The costs of starting-up your home business, promotional materials, product samples, meeting attendance, internet access fees, special phone services, fax lines, leads, web site fees, 800-numbers, printing costs, brief cases, business cards, home office furnishings—all can be 100% deductible if they are used 100% for business.

The rule of thumb is this: ANY EXPENSE you incur because of your business, that you would not have incurred if you didn't have a business, is probably deductible.

The Key To Your Biggest Deduction May Be In Your Ignition!

Many people in home-based business can honestly and legitimately deduct \$3,000 to \$5,000 or more per year, for using their personal vehicles for business purposes. Keeping a written log, showing the Date, Destination, Primary Purpose and Miles Traveled for each use, are the only records most people

will need to keep.

Note that only the Primary Purpose of each trip needs to be recorded, so if you combine a personal errand with a necessary business errand, the vehicle use is still tax-deductible, as long as the personal errand did not add any additional mileage.

Tax laws even give you a choice of methods of computing the value of your deductions. Figure the deductions both ways, and use the one that benefits you the most.

Even 'Family Trips' May Be Deductible, IF You Plan Them Correctly.

If you know the rules, you can combine business with pleasure (mostly pleasure!) and can usually deduct 100% of your travel costs, 100% of your hotel, 100% of your ground transportation, 100% of tips and gratuities and 50% of your meals—all as Business Expenses. Even if most of your time is spent 'playing' and sight seeing with your family!

To qualify, more than half of your days away from home need to qualify as "Business Days" So, what's a "Business Day?" Travel days usually count as business days, as do any days you attend a prescheduled meeting—No Matter How Brief!!

Hire Your Own Children In Your Business To Earn Tax-Free Income.

deductible to you as a business expense, and (d) the income they earn is 100% tax-free. That's as good as it gets!!!

If you have a minor child or children at least 6 years old, and employ him/her/them in your home-based business, (a) they are not subject to child labor laws, (b) no payroll withholding is required if they're under 18, (c) the wages you pay them are 100% tax

ALL Health Costs for your ENTIRE FAMILY Can Be Tax Deductible!

But ONLY if you own a business! Most *other* taxpayers can deduct only health care costs that exceed 10% of their taxable income. EXCEPT YOU! Owning a home-based business give YOU an IRS approved option for writing-off ALL non-reimbursed health costs. And it applies to all members of your immediate family, in addition to you.

Coverage can include insurance premiums, annual deductibles, co-pays, non-covered expenses like orthodontics, natural or holistic remedies, and even some over-the-counter drugs.

We're Talking About MAJOR TAX SAVINGS With a HOME BUSINESS!!

When the average entrepreneur understands what tax breaks are available to home-business owners, how easy it is to qualify and how simple recordkeeping requirements are, the new deductions will usually slash their taxes dramatically, sometimes up to 30 to 40 percent or more!

That means thousands of dollars in tax savings, which produces **thousands of dollars in new, additional tax REFUNDS**, year after year, for as long as you are actively running your business and making (or trying to make) a profit.

Average additional tax refunds for most is between \$3,000—\$6,000 per year, for around \$100 per week extra cash in your pocket!

You DON'T Need to Wait Until April 15th To Get Your Refunds!

You will be able to collect your additional refunds *throughout the year*. You do not have to wait until April 15th to get the money into your pocket. **That's HOW you can GET UNCLE SAM TO PAY FOR YOUR HOME-BASED BUSINESS!!** That's right, pay for, not "reimburse you later for."

You will have home-business-related expenses each month, so Congress lets you collect a portion of your additional tax refund every month also. **That way the extra money comes in as you need it!**

HERE IS HOW IT WORKS....

Let's say you're currently having \$1,000/month withheld from your paychecks for taxes—about what someone making \$40,000—\$45,000 a year in wages would pay.

Now let's say you compute that the new home-business deductions you can qualify for, will increase your refund by \$4,800/year (this is just an example, but it's realistic for many people.) That means you could begin having \$400 LESS per month withheld for payroll taxes (\$4,800 divided by 12 months).

So what happens to the \$400 that's no longer being withheld for taxes? It shows up in your Take-Home Pay!! Using that example, you'd begin putting \$400 per month—\$100 PER WEEK—extra cash in your pocket!

That "Pay Raise" will usually begin on the very next payday after you visit your payroll office to change your withholdings. (If this sounds a bit confusing, don't worry, it's a very easy form you make a correction to and hand to your pay roll person.)

Imagine that, an extra **\$100 cash** is landing in your pocket **every week!**

Now, here's the Question— Is \$400/month enough to cover the cost of

Answers range from 'Yes' to 'Yes'. For nearly everyone, \$400/month is **far more** than enough to pay for ALL home-business start-up costs and ongoing costs. You are now running your own business, and running it for **ZERO OUT-OF-POCKET COSTS!**

Here's an EXCITING THOUGHT—Since the tax benefits alone will cover your operational expenses, every Commission, Bonus or Sale you make in the business you run—will be PURE PROFIT!

Fair Warning: The Cost of Procrastination is H U G E !!

Every morning before you leave home for "work" - from now until the day you start your home-based business—open your kitchen window, throw a \$20 bill out the window, and watch it blow away in the breeze. Do that every morning until the day you begin your home-based business..

based business NOW.

Every single day that you do NOT have a home-business, you are throwing away about \$20 in over-paid taxes! Taxes are bleeding you to death. But you can control the bleeding NOW, by starting a home-

Your new tax refunds begin, when your new business begins. Not one day sooner. Until then, keep throwing those \$20 bills out the window..

Or, better, call the person who gave you this, and tell them "I want to start my business TODAY, and start collecting my big tax refunds TODAY."
